

Art of Being Green Energy Workshop and Luncheon

Geothermal Systems and How They Work

EVENT DATE: Saturday February 27, 2010

REGISTRATION COST: \$40.00 per person (pre-registration is required)

LOCATIONS

- 1) 404 Pretty Drive, Hopetown - Geothermal Closed Loop System – 4 Ton
- 2) 193 Pretty Drive, Hopetown - Geothermal closed Loop submersed in water- 4 Ton
- 3) 131 Mill Street, Lanark - Geothermal closed Loop – 12 Ton

EVENT DESCRIPTION

Sales of Energy saving geothermal systems that heat and cool buildings are booming in Ontario, thanks to government incentives and concern over rising fuel and electricity prices. These systems harness energy that lies naturally in the ground reducing fossil fuel or electricity use. A home that converts to geothermal from oil or electric resistance heating can cut heating and cooling costs by up to 70 percent.

What You Need to Know

You will have the opportunity to view 3 installed systems, ask the homeowners, equipment supplier, and the technical installation team questions on system cost, performance, savings, etc. We are fortunate to have George McKay from GeoSmart Energy and Tom Dlugosz from Comfort Pro who have extensive experience in the technology and the installation of geothermal systems.

Workshop Agenda

9:00 am	Registration and Coffee at Location 1
10:30 am	Location 2
11:45 am	Location 3
12:30 pm	Luncheon and Networking Opportunities
1:30 pm	Summary and questions
2:30 pm	<u>Set up Individual 15 minute Appointments with Speakers</u>

If you have been looking to learn more about the benefits of geothermal heating and cooling, this is an event you cannot afford to miss!

To register, please contact Judy Fisk at 613.278.0816 or e-mail at jefi@sympatico.ca by February 20
